

Sofie looking fetching. Great Grandmother of the current line.

Robyn aged about 8. Mother of Booster

Kissie; commonly known as big foot. Lovely nature but far too big for a bitch.

Abbie, adorable but at the back of the queue for brain cells.

Fliss at Xmas 2002. Trying to get a decent picture for next years Xmas Card this was the best we could do, Think we will use booster as he is much more of a show off than his daughter

Carla at Xmas 2002. She was a bit more obliging than her daughter but insisted on looking very solemn. Don't think we will be using this picture either

Booster at Xmas 2003. If you want a job done give it to the professionals. This dog is so photogenic its almost impossible to take a bad picture of him.

Fliss in September 2003 just after her first mating. Hopefully November will bring us some more lovely puppies
